Mobile Broadband

Our new mobile broadband service is perfect for Internet surfers on the go. The mobile broadband service includes a USB modem for laptops so you can explore all of the majesty and beauty of Central Oregon while still being connected to family, friends and yes, even work. With the launch of mobile broadband, you can think of Central Oregon as one great big wireless hot spot. In fact, we like to think of our mobile broadband service and our cool new USB modem as a...laptop's best friend. [View Coverage Map](#)
